

# Advanced Technologies. Old-Fashioned Values.

C&R Metalworks represents excellence and distinction in metal fabrication services. That's because we combine the newest technologies with "old-fashioned" business values like unparalleled customer

service and the highest quality craftsmanship. Our in-depth industry expertise and skilled professionals make us uniquely qualified to meet all your metal fabrication needs.

Throughout our engineering and manufacturing departments, we employ such state-of-the-art technologies as:

- **3-D AUTOCAD and Autodesk Inventor** engineering software—which enables us to incorporate your existing CAD files and designs in-house or perform all the conceptual, design and production work for you according to your specifications
- **CNC equipment**—which is optimized for small- and medium-lot work. Examples include:
  - Turret Punch, a rugged machine with close tolerance capabilities that shapes sheet material to exacting standards
  - Accupress Press-Brake, a highly accurate machine that forms intricate parts and pieces
  - Accushear, a heavy-duty shearing machine
- **An OMAX® Jet Machining Center**—which precisely cuts flat metal parts directly from CAD drawings

## C&R's welding capabilities include:

- MIG
- TIG
- Spot
- Stick

## We offer fabrication of:

- Aluminum
- Iron
- Stainless steel
- Titanium
- Brass
- Copper
- Carbon steel

# Craftsmanship That Never Goes Out Of Style.

Initially focusing on copper architectural sheet metal fabrication, C&R Metalworks has expanded its technological capabilities and expertise over the years to also include a comprehensive variety of metal compounds and products.

So for the highest quality craftsmanship in commercial applications, turn to C&R Metalworks. Our skilled family of artisans, draftsmen and fabricators will work closely with you to accommodate your design, budget and scheduling requirements.

## Comprehensive Services With A Personal Touch.

At C&R, we consider all jobs—no matter their size or budget—to be equally important. We take pride in delivering superior metalworking products that consistently meet or exceed our customers' expectations. What's more, given our size, we're able to provide a degree of personalized attention, one-on-one consultation and flexible services that you simply can't find at larger shops.

We're also committed to maintaining in-house the most sophisticated technologies available.

### Our comprehensive services include:

- All phases of metal fabrication work—from conception through design, 3-D modeling, production/manufacturing and assembly
- Customized and prototype work in small lots
- Component parts and/or complete assembly operations

# Making Our Mark ... Everywhere You Look.

Wherever you're located in the greater-Springfield area, chances are you've seen our work. That's because we serve an incredible diversity of commercial customers with an incredible diversity of end products.

## C&R works with companies in the following industries:

- Architectural
- Beverage
- Chemical
- Electronic/Electrical
- Pharmaceutical
- Petroleum

*CNC Accupress  
Press Brake — up to 12' capabilities*

*C&R, under the direction of co-owner Clint McAllister, was selected to fabricate the stainless steel architectural elements for the exterior & interior of the Last Chance Diner located at Celebration City Theme Park in Branson, MO.*

*C&R has in-house, cutting edge technologies – water-jet cutting machine*

*CNC Accushear 1/4" shear – 10' capabilities*

C&R fabricated the C&R sculpture for the County Employees Retirement Fund building in Jefferson City, MO

*"I have worked with Mr. Roy Cleous of C&R Metalworks for over three years on three major sculpture projects. Roy is very creative and a good team player. He is capable of seeing and delivering a project on time as well as on budget."*
